## WORK AND PROJECT EXPERIENCES

### ***Siaga Sampah (March 2016 – present)***

Siaga Sampah is an Android Application that allows people to report to the government about some dirty places (caused by garbage) which have to be cleaned up. I'm working as Full-Stack Developer.

### ***UILancer (February 2016 – present)***

UILancer is a Web Application that allows Universitas Indonesia (UI) students to search and apply some side jobs or create side jobs vacancy for other UI students. I'm working as Front-End Developer. I am responsible for concepting mockups and the interface of the web.

### ***Wireless Printing System (October – December 2015)***

It is a product that can let people to print documents without the printer's USB cable. It is connected by access point wireless and built by Raspberry Pi. My primary task was setting the sound-notification feature, meanwhile I also gave a little contribution to the bootsript. Documentation : <http://bit.ly/KA07-Sipiless>

### ***Online Canteen Mockup Proposal (September – December 2015)***

It is a mockup proposal to solve canteen problems, such as wrong orders, customers forget to pay their orders, etc. It is built by Balsamiq. We were working from the ideation, concepting, collecting data, designing, until testing. Documentation : <http://bit.ly/Sikolin-File>

### ***Software Engineer Part-Time at PT Nostra Solusi Teknologi (November 2014)***

I was working as a mockup creator and doing the documentation for Astra Project.

### ***Software Engineer Intern at PT Nostra Solusi Teknologi (July – August 2014)***

I was working as a mockup creator and doing the documentation for Astra Project. In that time, I was also studying basic things about NodeJS.

## **ORGANIZATION AND COMMITTEE EXPERIENCES**

### ***Chairman of BEM Fasilkom UI 2016 (February 2016 – present)***

BEM Fasilkom UI is an Executive Board of Fasilkom UI Student that has purposes to make benefits for Fasilkom UI Students and society. BEM Fasilkom UI runs many activities, such as running some extracurriculars or making competition to accommodate college student's talents, running some social activities for the society, and many more. As chairman, I have responsibilities for all activities/events that BEM Fasilkom UI runs. I also set myself as a Steering Committee of Computer Festival 8 and Computer Science League 2016.

### ***Head of Strategic Studies and Actions Department of BEM Fasilkom UI 2015 (February 2015 – November 2015)***

BEM Fasilkom UI as an Executive Board of Fasilkom UI Student has one purpose to make benefits for the society. One of the department which works in social movement is Strategic Studies and Actions Department. We ran some activities like social-politic discussion called Obrolan Santai and built a social-politic community called Syntax Error. We were also joining movement from all UI Student, such as "Evaluasi 1 Tahun Jokowi-JK".

### ***Vice Project Officer of Education and Career Universitas Indonesia (March 2014 – December 2014)***

Education and Career Universitas Indonesia is an event for people who want to prepare their after-graduate life from college. We successfully invited people from LPDP and leaders from start-up to be speakers for our seminars. The seminars were attended by +150 people from various universities in Jabodetabek. We also ran an IBT-TOEFL test and attended by 40 people.

### ***Staff of Business IT Case Competition of Computer Festival 2014 (March 2014 – December 2014)***

Computer Festival is one of the biggest non-profit IT event that ran by college student. In CompFest 2014, this is the first time of Business IT Case Competition was held. I was appointed as one of the team that search for the problems in this competition. More than 50 teams joined this competition.
